

HARMFUL EMFS

THE
TRUTH
ABOUT
5G

*How it interferes with our bodies
frequency*

MARLA PIETRUSZKO BSC RHN

The first country to adopt 5G on a large scale was South Korea, in April 2019. Swedish telecoms giant Ericsson predicted that 5G internet will cover up to 65% of the world's population by the end of 2025.

Mobile operators and telecommunication equipment companies around the world have been hard at work developing the technologies and hardware systems required to bring the fifth-generation (5G) of mobile networking to market in 2020.

We are already exposed to so many dangerous electro magnetic fields that have the capability to penetrate our cells and cause damage to our bodies.

In case you're not up to date, 5G is the latest generation of technology and it works completely differently than 4G. 4G was/is also harmful but not nearly as damaging as what is to come when 5G rolls out throughout the world.

4G works with slower and longer frequencies, typically below 6ghz. 5G works in the 30-60ghz range which are stronger and shorter frequencies.

Higher shorter frequencies (5G range) are the single most harmful EMF ranges for humans and the environment. Even though 4G was harmful, it is not in the range where it can get absorbed into the body as much as 5G wavelengths will.

5G waves are penetrate the bodies cells much more deeply. They are able to get absorbed directly into the body through the skin and can damage our brain, lungs and so many other organs. Radiation in the lungs can destroy our cells and prevent our body from being able to uptake oxygen from the air around us and as a result, our cells and tissues can literally suffocate. It would be similar to being at extremely high altitude without an oxygen tank.

The closer we get to 60ghz (tech companies can increase at anytime), the more damage it causes which can lead to severe irreversible nervous system/brain damage and destruction of our DNA sequence. This will prevent us from building new healthy cells.

Aside from this dangerous frequency being able to cause so much damage to humans, plants and animals, the scarier thought is that once it's up everywhere, there is no going back!

There aren't any effective natural remedies to stop the body from being starved of oxygen. The plants will also be lacking oxygen which means the oxygen available to sue form plants will become greatly diminished.

Elon Musks company has already placed 10,000 satellites around the Earth and by the end of 2022, they are expecting to have more than 40,000 satellites orbiting planet earth and releasing the incredibly harmful EMF radiation all over every inch of our beautiful planet 24/7. HOW SCARY IS THAT!? There will be nowhere we can go to escape it!

Once 5G is rolled out around the earth, you can expect to see mass deaths and extreme suffering and development of all sorts of cancers, disease and conditions.

I don't know about you, but I am TERRIFIED at the thought of this! 5G is predicted to single-handedly cause more human death and mass planetary devastation than any other technology or plague in all of history.

Independent scientists and tech workers from all over the world have been warning us about the irreversible consequences of 5G have been predicting that within only a few years of its implementation, we will see an incredible amount of death, extreme exacerbation of disease and sterilization of man and animals. They also talked about the destruction of the ecosystem that could lead to the end of farming and our food supply.

There are videos all over the internet of people feeling shocks as they pass 5G towers, of people having difficulty breathing near 5G towers and even of peoples noses bleeding around the towers!

If people are experiencing immediate symptoms with a slight increase in ghz, imagine what will happen when it increases up to 60ghz and surrounds every ince of our planet!?

The global plan is to erase 4G and below and switch to 5G networks everywhere to support faster wifi, self-driving cars and new technology.

The sad truth is that the large companies (Bill Gates, Elon Musk, W.H.O., etc) are controlling what information is allowed to be share don social media so many people are being quieted and content is being deleted that talks against anything unnatural.

Many individuals and holistic professionals believe 5G to be a bioweapon created to destroy life and depopulate the planet in a short amount of time. Whether or not this is true, we know that there is no way these tech companies do not know the harm they will be causing by releasing 5G throughout the world. Scientists have known since the 60's that this exact range 30-60ghz is the single most poisonous frequency for human life ever discovered.

We are definitely living in very scary times! This is our very near future. This is what we (and our children and grandchildren) are facing if something doesn't change. I'm not sharing this information to scare you but rather, to help you understand the dangers we are facing so that you can speak up and voice your concerns alongside the millions of people (if not billions) who are also concerned for our planet.

Now, what can we do about it? Share information about the dangers of 5G with your firends and family! Even if they think you are a 'quack' or conspiracy theorist, share it anyways!

Censorship is worse than ever and many articles, videos and even scientific journal articles talking about the dangers of 30-60ghz are being deleted or blocked.

Because of this, we need to keep reposting this information and getting it out there so that no matter how many times it gets deleted, someone is always reposting it.

If you would like to do even more to protest, do the following:

- Contact to your telecom provider and cancel your service if it's 5G.
- Get a community of people together and protest the installment of 5G towers in your neighbourhood or area.
- Reach out to individuals online who are like-minded and have them sign a petition against this.
- Like and share all videos on youtube talking about the dangers of 5G so that they build traction and can possibly go viral!

There are so many wicked companies running our world that only care about money and depopulation (HELLO BILL GATES) and we have to show them that we are seeing through their lies and smoke screens!

Let's all be here for each other and encourage your loved ones to research and see what is really happening on our planet.

There have been so many organizations forming and documentary series coming out sharing information about the dangers of 5G. Generation Zapped film is incredible and shares plenty of scientific evidence in regards to 5G dangers and thanks to them and many others, there is fast-increasing awareness of the negative effects from wireless radiation. Here are a few ways to minimize your wifi exposure NOW. The fight against wireless radiation needs to begin NOW and in YOUR HOME.

Turn off Wifi In Your Home:

1. Begin today by turning off your wifi router at night. This is the most important time to reduce EMF exposure! Keep track of how you and your family feel and sleep by simply practicing this one tip. Physically unplug your router before bed. It is easy to forget to do this so leave an alarm on your phone to go-off at a certain time in the evening to remind you or you can use a plug-in power timer (\$9).
2. Make sure the power cord is grounded (has a 3-pronged plug). for any notebooks in the house. The newest MacBooks don't have this grounded power cable so you will need to purchase it from Amazon. Here is an example of one.

3. Permanently switch back to wired internet (ethernet). While this suggestion may not be suitable for everyone, if you are able and do not use internet frequently (elderly people for example), this is next tip can be VERY HELPFUL. You can run long ethernet cables directly from your wired router to any room in your house through your attic, crawlspace and basement. This will allow you to connect your devices directly to the internet without using wifi. Josh del Sol explains how to do this: "You would want to use shielded ethernet cables (with metal ends), together with grounded ethernet adapters (USB-to-ethernet | thunderbolt-to-ethernet | USB-C-to-ethernet), to connect your computers to your ethernet router. Then manually shut off wifi and Bluetooth on your computers. (For wired iPads & iPhones, see Section 2.) If you're having difficulty turning off your router's wifi, call your ISP."

4. Try purchasing an EMF Testing Meter to determine if the wireless levels in and around your home are "slight, moderate, high, or extreme".

Use Your Cellphone Safely:

Your cell phone and laptop/ipad are likely the strongest sources of EMF radiation in your life. Even when they are not being used, signals are sent out almost continuously. These devices emit pulsating close-range radiation that enter your body, even in standby mode.

Whenever possible, follow these safety tips:

1. Turn off wifi on your cellphone and place it on airplane mode.
2. Turn off Bluetooth and do not use a Bluetooth earpiece.
3. Never hold the phone directly against your head. Instead of holding your phone next to your head during a call, always use either "hands free" or "speaker mode" or a wired earpiece.
4. Never place your laptop/ipad directly on your lap, stomach, etc.
5. Do not carry your phone in your pocket
6. For landlines, replace all wireless phones & base stations with corded phones. Most base stations emit harmful levels of radiation 24/7
7. Josh del Sol suggests using Blue-tube earpieces (\$20-37) which reduce cell phone radiation, as they remove any potential antenna effect up to your ear.

..

8. Use 3G instead of 4G/LTE or 5G as 3G emits MUCH less radiation.
On an iPhone, go to Settings> Cellular> Cellular Data Options> Enable LTE and select "Off". And, turn off Cellular Data entirely if you can.
9. You can even get an EMF-blocking phone sleeve to further protect you from your cellphones EMF radiation.

Avoid Using Wireless Devices:

1. Get a wired mouse
2. Get a wired Keyboard
3. Get rid of your wireless watch (apple watch, etc)
4. Use your printers USB cable instead of wifi
